Ergonomic 2-component T-handle

The ergonomically shaped 2-component T-handle with finger recesses and pleasant surface facilitates very high power transmission and fatigue-free working.

Second arm

The additional short arm, which emerges laterally from the handle, allows the transmission of extremely high torques by using the long arm as a lever.

Corrosion protection and fitting accuracy

Due to the special surface treatment, the blades receive a high level of corrosion protection. The optimum fitting accuracy of the screw is also guaranteed.

Hex-Plus

"Take it easy" Tool Finder

Hexagon socket screws are a problem, because the contact surfaces that transfer the force of the tool to the screw are very narrow. The consequence: the head of the screw can be damaged, usually rounding out the recess. Hex-Plus tools have larger contact surfaces to prevent this, driving from the flats of the recess, rather than the corners. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Screwdrivers with "Take it easy" tool finder: colour coding according to profile and size stamp.
