**The power zone**

The power zone has integrated soft zones near the blade tip to ensure high torque transfer for loosening or tightening screws without losing contact with the screw.

**The precision zone**

The precision zone directly above the blade gives the user a better feel for the right rotation angle during fine adjustment work.

**The fast-turning zone**

The fast-turning zone just below the rotating cap allows rapid twisting.

**The refined screwdriver for electronics technicians**

The Kraftform Micro, with its three zones and their specific arrangement, satisfies these requirements perfectly. The free-turning cap that provides support for the hand works with these advantages, enabling quick and easy precision work.

**"Take it easy" Tool Finder**

Screwdrivers with "Take it easy" tool finder: colour coding according to profile and size stamp.

**Wera Black Point tip**

The Wera Black Point tip and a refined hardening process ensure long service life of the tip, improved corrosion protection and an exact fit.
