## L-Keys for Hexagon Socket Screws

**EAN:** 4013288018939 **Size:** 200x36x9 mm

Part number:05022082001Weight:96 gArticle number:950 PKL inchCountry of origin:CZ

Customs tariff 82041100 number:

- L-keys for hexagonal socket screws
- Hex-Plus allows socket head screws to live longer
- · Hexagonal ballpoint on the long arm
- BlackLaser for high corrosion protection and long service life
- Imperial

High quality L-keys for imperial hexagonal socket screws. Hex-Plus offers a larger contact surface within the screw head. This reduces the notching effects to a minimum and almost completely eliminates the risk of destroying the screw recess. The ball-end on the long arm allows for reliable working even in difficult installation situations. The BlackLaser surface treatment provides outstanding surface protection, even against corrosion, and a long service life. The tools are quickly to hand thanks to the laser-engraved and thereby wear-resistant size markings on the L-keys.

#### L-Keys for Hexagon Socket Screws

We questioned the classic L-key

design, since all too often the

screw head recess is rounded out,

meaning screws can no longer be

tightened or loosened - and so the

user finds the L-key slipping out of

the recess. Wera Hex-Plus tools

have a larger contact surface in

the screw head. The notching

effects are reduced and thereby

the deformation of the screws. At

the same time, as much as 20 %

more torque can be applied.

#### L-Keys

### Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

#### Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

#### Size identification

The size of each L-keys has been engraved by a laser. In addition Take it easy L-keys have a colour coding according to sizes - for simple and rapid accessing of the required tool. Making it easy to find the right tool.

## Surface protection

Chrome-plated hexagon L-keys for outstanding surface protection and long service life. High corrosion protection.
