

<b>EAN:</b>	4013288221360	<b>Size:</b>	240x97x32 mm
<b>Part number:</b>	05022860001	<b>Weight:</b>	730 g
<b>Article number:</b>	3950/9 Hex-Plus Multicolour Imperial Stainless 1	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82041100

- Solution to the extraneous rust problem: fasten stainless screws with stainless tools
- Hex-Plus allows socket head screws to live longer
- With Take it easy tool finder: colour coding by size
- Colour coded, easy-to-grip plastic sleeve, even at low temperatures
- Wear-resistant clip material for enhanced durability

Premium L-key set made of stainless steel for imperial hexagonal socket screws by Wera. Stainless steel prevents transmission of extraneous rust. The Hex-Plus profile offers larger contact surfaces in the screw head. The notch effect is reduced to a minimum and the destruction of the screw head is almost eliminated. With hexagonal ball tip at the long arm: The ball-shaped tip profiles enable the tool shaft to be moved and pivoted relative to the screw axis which allows screwdriving "around the corner". Take it easy tool finder with colour coding by size. In an almost wear-free L-key clip.

## Our Autumn/Winter production innovations

### Set contents:

#### 3950 SPKL Multicolour Imperial

05022850001	1 x 5/64" x 101 mm
05022851001	1 x 3/32" x 112 mm
05022852001	1 x 1/8" x 123 mm
05022853001	1 x 5/32" x 137 mm
05022854001	1 x 3/16" x 154 mm
05022855001	1 x 7/32" x 172 mm
05022856001	1 x 1/4" x 185 mm
05022857001	1 x 5/16" x 195 mm
05022858001	1 x 3/8" x 224 mm

### L-Keys

We questioned the classic L-key design, since all too often the screw head recess is rounded out, meaning screws can no longer be tightened or loosened - and so the user finds the L-key slipping out of the recess. Wera Hex-Plus tools have a larger contact surface in the screw head. The notching effects are reduced and thereby the deformation of the screws. At the same time, as much as 20 % more torque can be applied.

### Stainless L-keys

Stainless L-keys are hardened to the same strength as conventional (carbon) steel tools, and prevent extraneous rust forming.

### Vacuum ice-hardened

The stainless steel tools from Wera are vacuum ice-hardened and have the hardness and strength needed for screw connections. There are no limitations to the industrial applications they are suitable for.

### Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Our Autumn/Winter production innovations

**L-keys with a thermoplastic sleeve**

L-keys made from circular material fit into the hand better and allow less strenuous work over a longer period. Additionally, the rubber sleeve provides a pleasant grip, particularly in applications at low temperatures. Colour coding and large stamp enable the desired L-key to be easily located. Moreover, the round material keys are more robust, particularly where smaller sizes are concerned.

**Secure hold and easy removal**

The wear-resistant clip material ensures that the L-keys are securely held yet are easy to remove.

**Take it easy tool finder system**

Take it easy tool finder system - with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).
