Description

The **Akyga® AK-AD-64** adapter was created for users of **Apple** devices. It is used to separate a single Lightning connector into **two separate Lightning sockets**. This is extremely useful when you have a device that does not have a separate headphone output. Especially when you don't have Bluetooth headphones. It allows you to **charge your device and listen to your favourite music at the same time**. That makes it a must-have accessory for anyone with a newer model of **iPhone, iPod** or **iPad**. What's more, the adapter has a lightweight and durable design. Its **slim shape** makes it easy to handle with the splitter plugged in. And that's even with a protective sleeve on your device.
