

## FEATURES

- ✓ Reversible electromagnetic door bolt NO (opened while energizing), cylinder enables the bolt to be opened with the key during the lack of power.
- ✓ It is possible to instal the bolt vertically or horizontally (bolt down).
- ✓ Signaling of closing and opening the door.
- ✓ Interlock against activation when the door is in the wrong position.
- ✓ Over voltage protection.
- ✓ Reverse polarity protection.
- ✓ Automatic closing.

## TECHNICAL DATA

Power supply	12 V DC
Power consumption - START	700 mA dla 12V DC
Power consumption - WORK	200 mA dla 12V DC
Adjustable closing delay	0, 3, 6, 9 sek.
