

PROXXON

For left- and right-hand threads, especially on bicycles and motorcycles.

Micro-Click torque wrench MC 60-Multi. 12 - 60Nm.

The open-end spanners enable lateral access for tightening screws and sleeves on pipe connections, hydraulic systems and threaded rods.

Automatic quick release: Clearly audible and palpable click signal when selected torque is reached. Piece by piece calibration and inspection for high accuracy according to ISO 6789 (+/- 3 %) with certificate of conformity. 10 open-end spanners, made from CrV steel, in sizes 10 - 19mm. Ratcheting head with 3/8"-square drive (10mm) and 4 screwdriver bits with 3/8"-drive (10 mm) for HX 5 - 6 - 7 and 8mm with CrV sockets and bits of special steel. Packaged in a sturdy plastic storage case.
