

MultiStrip® 10 plus

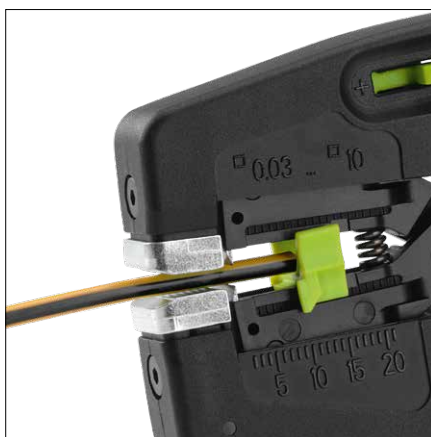

- Suitable for single- and multi-conductor cables with PVC insulation and a wide range of special insulation types, such as PTFE and rubber insulation
- Insulation strippers adjust automatically to the cross-section and insulation thickness
- Metal clamping jaws hold the cable securely without slipping and without damaging the remaining insulation
- Precise and self-adjusting square crimping of wire end ferrules according to DIN 46228 part 1+4
- Consistent crimping quality by forced-lock completion of crimping process
- Interchangeable blade block and length stop
- Glass fibre-reinforced housing, ergonomic two-component grip

Art. No. 707 070

Possibility of fine adjustment – optimal adaptation to special materials or temperature conditions

Metallic clamping jaws and easily adjustable length stop for automatic stripping

Area for personalising the tool, eyelet for a tool tether
