

Processing contacts and connectors

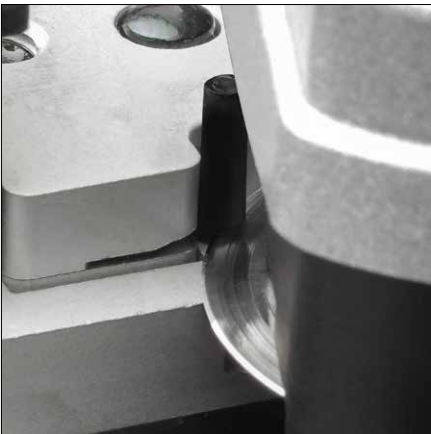

Tools for fibre-optic cables

Tools for processing polymer optical fibre

- Special cutting operation allows further processing of fibers without polishing the cut surface
- Optimal damping values guarantee a high data transmission quality
- Interchangeable cutting systems available in different designs
- Highest service life of blades with minimized wear

Art. No. 8001 4000 3

Cut and...

strip the cable, and...

crimp the plug with the prepared cable in just one tool

Art. No.	EAN 4049002	Description	↔ mm	⚖ g
8000 4000 3	026515	Tool for cutting, stripping and crimping POF dia. 2.2 mm for Toshiba connectors, with manual blade advance	180	670
8001 4000 3	026522	Tool for cutting, stripping and crimping POF dia. 2.2 mm for Toshiba connectors, with safety cutting system	180	590
