

EG380 Industrial glue gun

It is the most powerful 12mm glue gun that provides glue output up to 2200 g/h for industrial use. Fastest heating time of less than 2min.

EG380 is equipped with double heating cartridges and strong feeding mechanism which allows highest glue output. Its mechanical thermostat gives most accurate temperature regulation from 130 to 230°C.

Applications : PVC, Cables and tiles sealing, Electronics and electrics, Furniture and wood working, manual and corrugated carton sealing, trade exhibits and installation ...

Features:

- Light weight, ergonomic design for a best comfort in intensive works.
- Very high glue output
- Interchangeable nozzle according to applications
- Smooth-4 fingers soft grip trigger for best comfort and reducing effort required
- Long cord for flexibility and mobility
- Mobile and fixed stand for best efficiency
- Main switch ON/OFF
- For both low and high temperature glue sticks

Specifications:

- Power rating : 400W
- Working Voltage : 220-240V
- Glue Output : 40g/min - 2200gr/h
- Heating Time (195°C) : < 2 min
- Cord length : 3.50m (rubber)
- Adjustable temperature : 130 to 230°C
- Nozzle : Ø 3.0mm
- Dim : 240*360*80mm
- Weight : 1.10kg
