

## R1600 – Hot Air Gun

**Designed for DIY applications, R1600** is perfect to work at home and all around it.

**R1600** is easy to use thanks to its light weight, compact size and its two temperature settings of 400 °C and 550 °C.

Its stable desk bench position allows you to work with free hands.

Its 300L /min airflow makes it ideal to remove paint, defrost freezers or remove stickers on non-sensitive material, and much more.

All accessories (nozzles, shrink tubes...) are available separately
