Description

The **Akyga® AK-EC-17 adapter** is a device that enables you to charge electric cars with a **CCS Combo 1 connector** using a charger with a **CCS Combo 2 connector**. It is particularly useful if you are importing an electric car from the USA to Europe. With the adapter, you can easily charge your vehicle using the **DC fast charging stations** available in Europe. What's more, the adapter is equipped with a **30 cm long cable**, allowing it to be easily and conveniently connected to your EV device.

The adaptor is made of high-quality materials, which guarantees safety when charging your vehicle with **up to 150 kW**. In addition, its compact size means that it takes up little space in the boot of the car. This is particularly important for those travelling with a large load.
