TR-12 car transmitter is a multifunctional device equipped with Bluetooth 5.0. The used chipset allows playing music in excellent quality. Two USB ports allow to quickly charge a smartphone using Quick Charge 3.0 and Power Delivery technologies. Combination of the hands-free function with a high-class rotary microphone guarantees the best quality during calls. The transmitter is equipped with a 5-step joystick which allows for quick and easy operation, LED display, Bass Boost function, and support for Google Assistant and Siri services.
