- Backlight intensity adjustment
- Rubber elements guarantee stability of the keyboard during work
- Ability to change the WSAD keys to the arrows

The SAVIO Tempest RX Mechanical Gaming Keyboard is an uncompromising combination of top quality and low price. Specially designed "double-injection" keys have been combined with reliable OUTEMU BROWN switches.

Tempest RX is a TKL (tenkeyless) keyboard, i.e. a tournament keyboard without a numeric block with a total of 87 keys.

Switch Outemu BROWN is a universal, quiet switch for writing and playing with perceptible resistance as in the case of the BROWN switch, but without a characteristic click. Low pressure – just 55g with a noticeable response at the time of activation.
