SAVIO VALIANT gaming mouse is perfect for demanding users. For this reason, it has features three interchangeable side panels mounted with strong magnets. You can choose overlays with 3, 5, or as many as 10 side buttons. They will give you a significant advantage on the battlefield. From now on, you can program any macro and have everything at your fingertips, while other players are looking for button shortcuts on the keyboard! You don't have to be a professional gamer to appreciate the capabilities of this mouse. It's perfect for programmers or graphic designers because of its design and ease of use. The multitude of possibilities for setting up shortcuts will significantly reduce time and increase productivity.
