Description

Akyga® AK-AD-52 adapter is an irreplaceable USB C hub, which will find use for every owner of a modern laptop equipped with a USB C port. By connecting the adapter to a laptop or other mobile device, we extend the socket with an additional four USB 3.1 ports, which will allow you to connect, for example, a keyboard, mouse, external drive, pen drive and many other peripherals to the device. Furthermore, the adapter is an active hub, since it has a 3.5x1.35 DC plug to connect the power supply, which will ensure stable operation of devices with increased energy requirements, and enable charging four devices at once.
