

# HSS Countersink With Limit Stop, Hexagon Shank

**2-in-1 function for preparing screw connections  
in metal and plastic**

## Properties

- screw starter with countersink for drilling and countersinking in metal, plastic and fibreglass-reinforced plastic (FRP)
- high heat resistance with long service life
- 90° countersinking angle for preparing flush screw connections with countersink screws
- special 3-edge cutting geometry for quiet running and fast work progress
- cutting edges with radial relief for clean countersinking without tear-out, with high cutting performance
- limit stop for controlled drilling, prevents inadvertent break-through and damage to the substructure
- 1/4" hexagon shank for quick tool changes
- high quality „Made in Germany“

## Suitable for material

Suitable for material

Metal, Non-ferrous metal, Plastic, Fibreglass-reinforced plastic (FRP)

## Instructions

For use on metal, it is mandatory to first centre punch the material and to use cutting oil.

# HSS Countersink With Limit Stop, Hexagon Shank

## Technical data

Number of cutting edges	3
Countersinking angle	90°
Shank version	Hexagon shank A/F 6.35 mm (1/4")
Direction of rotation	Clockwise rotation

## Compatible with tool

Power Drill, Cordless Screwdriver
