

Hand-Held Enlarging Mill with Marking Tip

For centre-punching in plasterboard as well as deburring and expanding boreholes in plastic

Properties

- hand-held enlarging mill made of tool steel for a variety of electrical installation tasks
- with marking tip for centre-punching drilling positions in drywall materials and for good control when breaking out the pre-cut plastic parts of installation boxes
- special 9-blade geometry for manually expanding boreholes in plastic, e.g. for cable feedthroughs
- pointed conical shape for deburring boreholes or cleaning edges
- handy grip made of high-quality plastic for ergonomic work
