

“Installing Hollow Wall Boxes” Success Kit

For preparing electrical installations in drywall structures

Properties

- 3-piece complete kit for installing hollow wall boxes in drywall
- 1 marking and alignment template for fast, error-free installation of sockets and switch inserts in drywall
- level for easily aligning the template to accurately mark the drilling position, as well as for aligning the installation boxes and inserts
- 71 and 91 mm markings for easily copying the correct installation distances between two installation boxes as well as between power sockets and TV/network sockets
- illustrated step-by-step instructions on how to correctly use the template for safe and convenient installation
- 1 carbon steel hole saw Ø 68 mm, 30 mm cutting depth, for use on softwood and drywall
- includes mandrel with centring drill bit (Ø 6 mm)
- 1/4" hexagon shank, can be used in all standard power drills and cordless screwdrivers as well as power tools with 1/4" receptacle or bit holders
- triple tooth groups for low resistance and for fine and clean cuts
- TÜV-tested quality for highest on-the-job safety
- 1 deburrer for clean, sunken holes and flush installation
- special countersinking angle for flush installation of customary hollow wall boxes
- 3 sharp, replaceable blades for clean cutting edges
- ergonomic geometry for easy countersinking in no time

“Installing Hollow Wall Boxes” Success Kit
