

# Clamping Jaws with Rest Pins

**Helpers for fastening and working on workpieces on all tables with 20 mm holes**

## Properties

- 4 clamping jaws with rest pins, compatible with all 20 mm bores, such as those in the tables in the wolcraft MASTER series, for flexibly securing workpieces horizontally and clamping round workpieces
- extra-large 42 mm support surface with V-groove for powerful clamping of round materials
- for use as a work bench gripper with anti-slip function for machining workpieces
- high-quality plastic design "Made in Europe" for durability
- plug-in reversible module with practical, double-sided support areas for diverse tasks
- a sharp tip each for supporting workpieces during painting work
- a flat side each for use as anti-slip support for a raised working position when performing intricate work

## Accessories for
