

Angular Bevel Gauge for Mitre Saws

For measuring and transferring angles

Properties

- 2 plastic legs for measuring wall angles from 30 to 180°
- eccentric lever for convenient fastening at the measured angle, even in constricted workspaces
- telescopic corner callipers makes it possible to measuring outside corners
- 2 magnets for easy attachment to saw blade, for aligning the angle at the mitre saw
- automatic angle bisector for the correct mitre cut makes your work easier and reduces errors
- easy marking of angles at the workpiece, thanks to the integrated foldable stop

Technical data

Angle min - max 30 – 180°
