# OUR MOMENTUM, YOUR PRECISION.

// *The new TIMBER TWIST.  
The partner for the perfect hole in every wood.*

 **TIMBER TWIST**

  
**alpen**  
*drill better.*

### ***The drilling experts – for generations***

*We are the only complete supplier of drilling tools in Europe from own production and the leading manufacturer of metal, stone, and wood drills. High quality has been for us as an Austrian family business the standard for over 60 years. Whatever is needed: We supply the right drill, making it even more efficient, precise and optimal results can be achieved more quickly. In short: We ensure the perfect work result.*

---

### ***When efficiency meets precision, excellence is the result.***

*Regardless of whether you are a professional or a hobbyist, nobody wants to waste precious minutes with waiting for a power tool battery to charge. That's why we've done everything we can in our development to improve the battery life of our new drill - and we've done it! The new TIMBER TWIST is impressive with its greatly reduced energy requirement when drilling thanks to the special tip geometry. This means that all types of wood can be drilled quickly and precisely and at the same time saving the battery life significantly. Constant battery replacement is a thing of the past and long-lasting performance can be enjoyed.*

# CHARGE LESS DRILL MORE.

*The future of efficient craftsmanship.*

// The new TIMBER TWIST enables work without interruptions. Thanks to drastically reduced friction when drilling because less force is needed and also huge power consumption savings – for an efficient and sustainable drilling experience.

We know: Precision is the key to success in any craft project.

Thus, the new TIMBER TWIST guarantees the best centering, safe entry and precise, tear-free results without clogging. Precision, efficiency and performance are increased with the new TIMBER TWIST.

## **Precise to a hair's breadth**

The optimized pre-cutters ensure an accurate and tear-free drill hole.

## **Fast and easy**

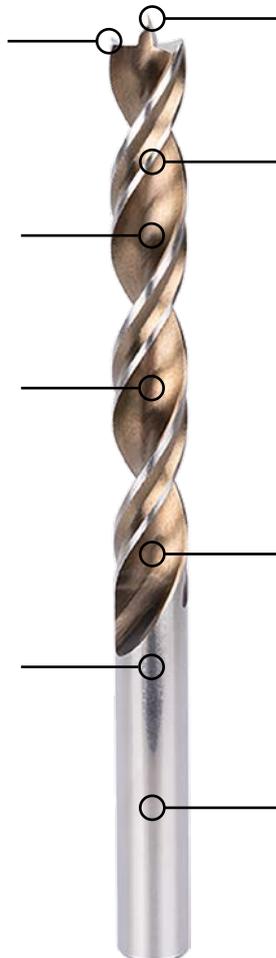

Due to the reduced friction the material to be processed is cut through without much effort.

## **Stable**

More stability through the adjusted increasing core.

## **Core pitch**

From a diameter of 10.5mm the shank is reduced so that it fits into any drill chuck.

## **Best centering**

Thanks to the improved tip, you can find the center in no time at all and require little effort in the first drilling phase.

## **Safe**

Due to the double chamfer the drill is optimally guided in the drill hole and guarantees a perfect dowel fit.

## **Clean**

The newly developed groove geometry ensures hassle-free chip removal.

## **Effortless - energy-saving**

Because of the new construction less contact pressure needs to be expended.

 **TIMBER TWIST****Area of application:**

For tear-free, precise drilling in all types of wood, as well as wood composites and especially hard, coated chipboard. For accurate work in the carpentry sector. (carpentry, restoration, instrument making, model making, assembly,...)

- // Tear-free drilling thanks to optimized pre-cutters
- // Optimum guidance in the drill hole thanks to the double chamfer
- // Best drill hole quality
- // Significantly increased service life
- // Fast working thanks to the optimized tip
