

APPROVAL SHEET

MULTILAYER CERAMIC CAPACITORS

Soft Termination MLCC for Automotive (ST series)

Qualified to AEC-Q200

0402 to 1812 Sizes (10V to 3000V)

X7R Dielectric

Halogen Free & RoHS Compliance

*Contents in this sheet are subject to change without prior notice.

Multilayer Ceramic Capacitors

1. DESCRIPTION

WTC Soft Termination Chip Multilayer Ceramic Capacitors for Automotive is designed and with a polymer layer within end terminations of product, which can absorb mechanical stress caused by PCB handling in SMT line and reduce the mechanical impact for product. It will offer more robust and reliable performance in applications.

WTC's ST series MLCC is made by X7R dielectric and which provides product with high electrical precision, stability and reliability. Besides, ST series MLCC is tighten controlling in quality in line to assure quality performance in automotive applications. The ST series is AEC-Q200 compliant.

2. FEATURES

- a. MLCC's terminations are with a soft & flexible polymer layer to withstand high bending stress in SMT line.
- b. High reliability: AEC-Q200.

3. APPLICATIONS

- a. Automotive, power supply and related industries. .
- b. The other mechanical stress concerned products or the set having a high probability of fall.
- c. Prevention of ceramic body cracks by board bending.

4. HOW TO ORDER

Reflow soldering only is recommended.

6. GENERAL ELECTRICAL DATA

Dielectric	X7R
Size	0402, 0603, 0805, 1206, 1210, 1812
Capacitance range*	270pF to 10μF
Capacitance tolerance**	J (±5%), K (±10%), M (±20%)
Rated voltage (WVDC)	10V, 16V, 25V, 50V, 100V, 1000V, 3000V
Operating temperature	-55 to +125°C
Capacitance characteristic	±15%
Termination	Ni/Sn (lead-free termination)

* Measured at the condition of 30~70% related humidity.

Measured at 1.0±0.2Vrms, 30~70% related humidity, 25°C ambient temperature for X7R.

** Preconditioning for Class II MLCC: Perform a heat treatment at 150±10°C for 1 hour, then leave in a mbient condition for 24±2 hours before measurement.

□ Peeling force (EIA-481)

Peel-off force should be in the range of 10 grams to 100 grams at a peel-off speed of 300±10 mm/min.

Multilayer Ceramic Capacitors

□ Example of customer label

- | |
|--|
| a. Customer name |
| b. WTC order series and item number |
| c. Customer P/O |
| d. Customer P/N |
| e. Description of product |
| f. Quantity |
| g. Bar code including quantity & WTC P/N or customer |
| h. WTC P/N |
| i. Shipping date |
| j. Order bar code including series and item numbers |
| k. Serial number of label |

*Customized label is available upon request

□ Constructions

No.	Name		X7R
①	Ceramic material		BaTiO ₃ based
②	Inner electrode		Ni
③	Termination	Inner layer	Cu + Conductive Resin
	Middle layer	Ni	
	Outer layer	Sn (Matt)	

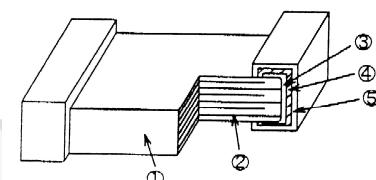

Fig. 5 The construction of MLCC

□ Storage and handling conditions

- (1) To store products at 5 to 40°C ambient temperature and 20 to 70% related humidity conditions; MSL Level 1.
- (2) The product is recommended to be used within one year after shipment. Check solderability in case of shelf life extension is needed.

Cautions:

- The corrosive gas reacts on the terminal electrodes of capacitors, and results in the poor solderability. Do not store the capacitors in the ambience of corrosive gas (e.g., hydrogen sulfide, sulfur dioxide, chlorine, ammonia gas etc.)
- In corrosive atmosphere, solderability might be degraded, and silver migration might occur to cause low reliability.
- Due to the dewing by rapid humidity change, or the photochemical change of the terminal electrode by direct sunlight, the solderability and electrical performance may deteriorate. Do not store capacitors under direct sunlight or dewing condition. To store products on the shelf and avoid exposure to moisture.

Multilayer Ceramic Capacitors

□ Recommended soldering conditions

The lead-free termination MLCCs are not only to be used on SMT against lead-free solder paste, but also suitable against lead-containing solder paste. If the optimized solder joint is requested, increasing soldering time, temperature and concentration of N₂ within oven are recommended.
