51-685-1405B	M	220 mm	90 mm	Green
51-685-1410B	L	230mm	90 mm	Grey
51-685-1415B	XL	240 mm	95 mm	Red
51-685-1420B	XXL	250 mm	95 mm	Brown

Instructions for the maintenance and use of protective gloves

Keep gloves away from heat and direct light, not exposed to organic solvents and their vapors. Before use, thoroughly inspect new or used gloves to ensure that they are free of defects. The gloves cannot be washed or chemically cleaned.

Warning

Do not use gloves when there is a risk of catching moving parts of the machine. The protective property only binds to the front of the glove - palm. Always use the correct size gloves and visually check their condition before each use. Never wear worn, damaged or otherwise damaged gloves. In people with sensitive skin, the possibility of skin irritation is not excluded, as the elastic cuff contains natural latex, which causes an allergic reaction in some people. In this case, do not continue to use gloves and seek professional help.

Note

The specified level of protection, according to EN 388, can help with the selection of the glove, but it is important to note that the application conditions cannot be simulated in a laboratory, and it is the responsibility of the user, not the manufacturer, to approve the application in specific conditions (working operation).
