

AMED120W-GY

DIN Rail

The AMED120W-GY is a DIN-rail mounting AC/DC converter that features a cost-effective and energy efficient design. With an ultra-wide input voltage range of 180-550VAC, the power supply is designed to be powered by single and dual phase power distribution systems and has output voltage range from 12-48V. This converter measures 40.00 x 113.00 x 125.00mm and has ambient air-cooling vents both at the top and bottom of the converter for improved thermal performance.

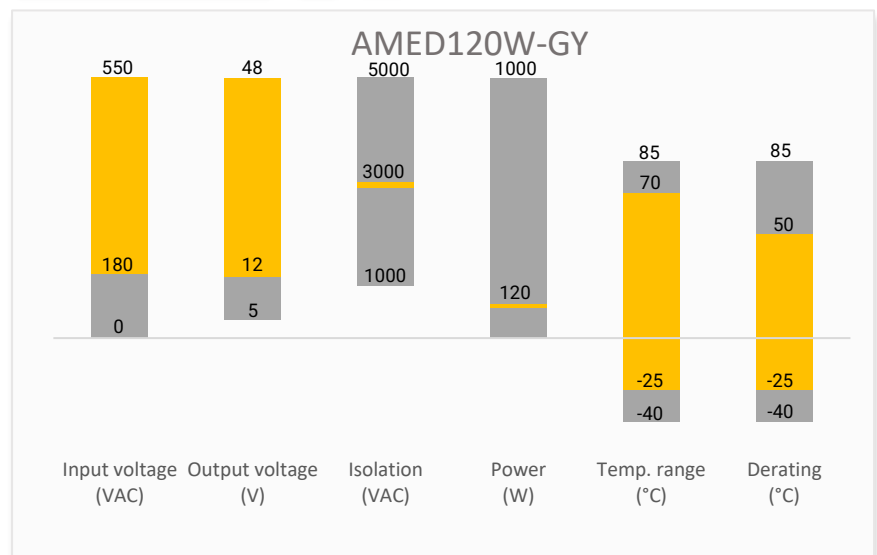

This series offers great operating temperatures from -25°C to 70°C and features an isolation of 3000VAC for improved reliability and system safety. Furthermore, a high MTBF of 1,300,000h, output short circuit protection (OSCP), output over-load protection (OLP), output over-voltage protection (OVP), and an over temperature protection (OTP) come standard with the series.

The AMED120W-GY is suitable for electric distribution boxes, grid power, instrumentation, CNC machines, industrial control panels and building automation applications.
