

XTAR AA Lithium 2700mWh Battery with Low Voltage Indicator

Parameters

Nominal Capacity	2700mWh
Nominal Voltage	1.5V
Voltage output at low power	1.1V
Maximum continuous discharge current	2.0A
Weight	19.1g
Size	Φ14.3±0.3mm×H50.3±0.5mm
Protected	Yes

Unique low-voltage indicator function

Upgraded base on 1.5V constant voltage output batteries

Note: its accurate voltage control IC enables the device (with low power indicator function) to remind the user in time when the power is insufficient.

When the battery level is low, please recharge it promptly to avoid being unable to open the door.

- Unique built-in voltage control IC enables the devices which have lower power indicator function to remind you in time when the power is insufficient. Very useful for smart door locks, LED ring lights etc.
- High capacity of 2700mWh, continuous discharge current of max 2A.
- Works under the condition of -20 – 60°C
- Charged by LC4, BC4, BC8, L4, and L8.

Charging indicator

Battery green LED flickering
Reviving or charging

Battery green LED non-flickering
Fully charged

Note: Please charge with its exclusive charger LC4 only.
