

Technical card

LP-520P-5

Industrial hermetic focusable laser point marker.
Laser for industrial applications

Technical data	
Safety class	3R from PN-EN 60825-1:2014
Wavelength	$\lambda = 520 \text{ nm} \pm 10 \text{ nm}$
Optical power	$4,5 \text{ mW} \pm 0,5 \text{ mW}$
Operating voltage	9 - 28 VDC
Operating current	< 100 mA
Laser diode isolated against housing	
Distance of focus	Possibility to adjust the focus from few cm to several metres (external focus mechanism)
International Protection Rating	IP65
Housing and dimensions	aluminium housing, black anodized, $\phi 20 \text{ mm} \times 130 \text{ mm}$
Chromed brass mounting: M18 x 1	
Operating temperature	-20° to 60°C
Storage temperature	-40° to 85°C
M12 plug, 4-pin: M12 x 1	
Electrical connection markers	(+) 1: voltage supply, (-) 3: voltage supply
Warranty	2 years
Product is CE marked	

Options:

- Different optical power, wavelengths, elliptical or symmetrical dot
- Light modulation
