## INSTRUCTION MANUAL

# FAE1110

Pre-Filter for FAE1

This manual corresponds to the following reference:

**FAE1-110** *(includes 1 filter and can only be ordered in groups of 5)*

## Packing List

The purchased bundle includes:

**Pre-Filter for FAE1** ..... 5 units

**Manual** ..... 1 unit  
Ref. 0022929

## Features

This Pre-filters are used in FAE1\* fume extractors and retain large solid particles in order to protect HEPA filter and extend its lifetime.

The indicator LED and the display of FAE1 show the filter status.

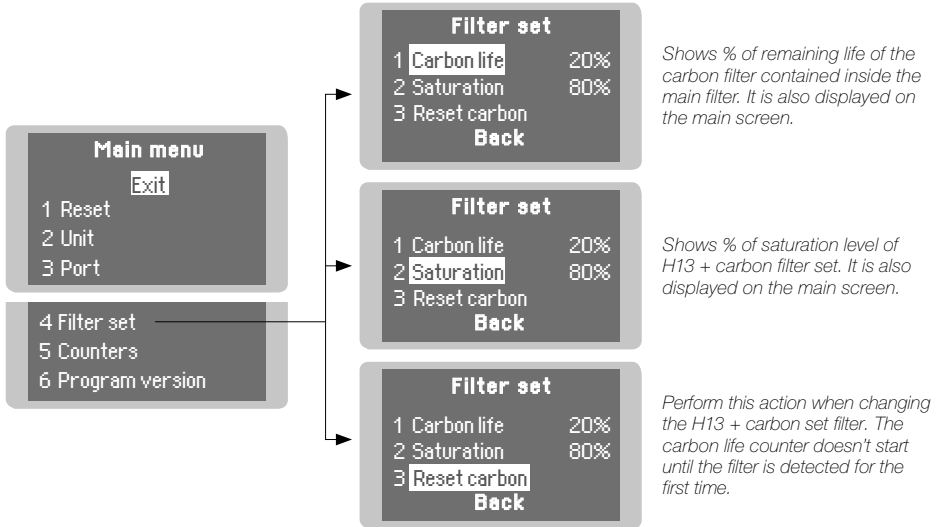

Follow the indications described in section "Maintenance" to replace the filters when they are worn.

*\*not included, sold separately.*

## Control Process

### Filter Menu

### Warning & Errors

**WARNING #1**  
Useful filter life is about to wear out. In X days the filter life is going to finish.

≤ 20% carbon lifetime  
(Filter indicator in Yellow)

**WARNING #2**  
Filter is about to obstruct.

≥ 80% Saturation  
(Filter indicator in Yellow)

**STOP #1**  
Useful filter life is worn out. Replace it and execute reset function in the filter menu.

End of carbon lifetime  
(Filter indicator in Red)

**STOP #2**  
Filter obstructed. Replace the pre-filter, if the error remains, replace the HEPA+carbon filter set.

Filter saturated  
(Filter indicator in Red)

**STOP #3**  
Filter not detected. Place a filter in order to use the fume extractor.

No filter installed  
(Filter indicator in Red)

## Maintenance - Filter Replacement

- The fume extractor unit indicates by means of the display and the indicator LED (3) that the filters need to be replaced.
- To replace the filters remove the cover (1) by opening the quick release levers (2), located on both sides of the casing.
- If the indicator LED (3) remains in red after replacing the pre-filter (4), it means that the main filter (5) is saturated and must also be replaced (see figure below) (6).
- After replacing the main filter (5), the carbon filter counter must be reset (Main Menu: *Filter Set > Reset Carbon*).
- The service life of the main filter is a maximum of 1 year after opening its packaging.
- If the main filter is changed while the fume extractor is switched on, the fume extractor unit automatically starts the filter detection process and activates the aspiration for a few seconds.

**Note:** The main filter has a given position. Make sure the filter ribs mate with the corresponding slots of the casing.

Connect the filter tube to the quick-coupling located on the fume extractor casing.

## Safety

**It is imperative to follow safety guidelines to prevent electric shock, injury, fire or explosion.**

- The equipment is only designed to filtrate the fumes generated by soldering.
- Do not use the units for the filtration of combustible, explosive or corrosive gases. Incorrect use may cause fire.
- Maintenance must not be carried out by children unless supervised.
- Keep your workplace clean and tidy. Wear appropriate protective mask, glasses and gloves when handling dirt filter or pre-filter.
- Saturated filters can not be cleaned and reused.
- Avoid blowing the filter or the dirty parts of the equipment, if necessary it is advisable to vacuum.
- Avoid losing particles in the unit during handling of the filter.
- Treat the saturated filters as waste depending on the filtered contaminant and the applicable standards in each country.

European Waste Catalog classification:

15 02: Absorbents, filter materials, wiping cloths and protective clothing.

15 02 02: Absorbents, filter materials (including oil filters not otherwise specified, wiping cloths, protective clothing contaminated by dangerous substances.

15 02 03: Absorbents, filter materials, wiping cloths and protective clothing other than those mentioned in 15 02 02.

- In case of not complying with the filter change recommendations, the maximum particle and gas concentrations established in each country could be exceeded.
