

# 6001-IECIV

## DATA SHEET (page 1 of 2).

Designation : Hook Clip w/ 4 mm Banana (female) Jack (socket).

Applications : to grasp conductive parts safely to measure voltages. General purpose electric and electronic testing, controlling, and measuring.

Examples of grip : Ø9 mm round section and 1 mm x 16 mm rectangular section.

When released the safety is IP2X (touch proof).

Syringe-type ergonomics for better handling.

heavy duty insulated hook.

Electro-PJP's marking.  
(French design and  
manufacturing.)

European Union  
marking. CE.

Voltage and  
current markings.

19 mm overall width.

The safety 4 mm banana  
female connection complies  
with the 4 mm banana plugs  
of the worldwide  
manufacturers.

# 6001-IECIV

## DATA SHEET (page 2 of 2).

Designation : Hook Clip w/ 4 mm Banana (female) Jack (socket).

### Electrical safety

1500 V CAT II  
1500 V CAT III  
1000 V CAT IV

1500 V CAT II / 1500 V CAT III / 1000 V CAT IV, reinforced insulation, 20 amperes (at +45 °C). According to EN / IEC 61010-031:2015+A1:2018.

These specifications come from the creepage distances, clearances, accessible parts, and solid insulation of the clip. And the considered specifications of the environment are :  
pollution degree, 1 or 2 ;  
relative humidity, 80 % maximum for temperatures up to 31 °C decreasing linearly to 50 % relative humidity at +40 °C ;  
temperature range, +5 °C to +45 °C ;  
indoor use ; and  
altitude, 2000 m maximum.

Keep behind this protective finger guard to operate safely the product while connecting to hazardous live voltages (more than 30 V AC and 60 V DC).

Operating temperature range +5 °C mini., +45 °C maxi..

Protection against the spread of fire According to EN / IEC 61010-031:2015+A1:2018. Reinforced insulation.

Conformity

- European Directive “Low Voltage Directive” 2014/35/UE.
- International / European standard EN / IEC 61010-031:2015.
- European Directive “RoHS” 2011/65/EU. European Directive 2015/863/EU.
- European regulation n°1907 / 2006 “REACH”.
- European regulation 2017 / 821 “Conflict minerals”.

Environment

- “RoHS” compliant, Pb ≤ 4 %, Hg ≤ 0.1 %, Cr VI ≤ 0.1 %, Cd ≤ 0.01 %, PBB ≤ 0.1 %, PBDE ≤ 0.1 %, DEHP ≤ 0.1 %, BBP ≤ 0.1 %, DBP ≤ 0.1 %, and DIBP ≤ 0.1 %.
- REACH compliant, no substances from the candidate list of SVHC for authorization at mass concentrations greater than 0.1 %.

Materials Conductors : nickel-coated brass, steel, and brass. Insulators : please contact us.

Colors

Black	Red	Yellow	Green	Blue	White
Brown	Gray				

Weight 0.028 kg.

Origin  Designed and manufactured in France.

Reliability benchmark Year of 1st placing on the market 2016.

Packaging Packaging of 5 units of the same color (default packaging).

## GLOSSARY :

ACCESSIBLE. Able to be touched with a standard test finger or test pin.

BASIC INSULATION. Insulation of HAZARDOUS LIVE parts which provides basic protection.

CAT II. Circuits connected directly to utilization points (socket outlets, etc.) of the low-voltage mains installation.

CAT III. Circuits connected to the distribution part of the building's low-voltage mains installation.

CAT IV. Circuits connected at the source of the building's low-voltage mains installation.

CLEARANCE. Shortest distance in air between two conductive parts.

CREEPAGE DISTANCE. Shortest distance along the surface of a solid insulating material between two conductive parts.

CTI. Comparative Tracking Index of the insulating material in accordance with IEC 60112.

DOUBLE INSULATION. Insulation comprising both BASIC INSULATION and SUPPLEMENTARY INSULATION.

EN / IEC 60529. European / international standard regarding the degrees of protection provided by enclosures.

EN / IEC 61010-1. European / international standard regarding the safety requirements for electrical equipment for measurement, control, and laboratory use – Part 1: General requirements.

EN / IEC 61010-031. European / international standard regarding the safety requirements for electrical equipment for measurement, control and laboratory use – Part 031: Safety requirements for hand-held probe assemblies for electrical measurement and test.

LVD. European Directive 2014/35/EU on the harmonization of the laws of Member States relating to electrical equipment designed for use within certain voltage limits. (Usually called the Low Voltage Directive.)

MAINS. Low-voltage electricity supply system to which the equipment concerned is designed to be connected for the purpose of powering the equipment.

MAINS CIRCUIT. Circuit which is intended to be directly connected to the MAINS for the purpose of powering the equipment.

OVERVOLTAGE CATEGORY. Numeral defining a TRANSIENT OVERVOLTAGE condition.

POLLUTION. Addition of foreign matter, solid, liquid or gaseous (ionized gases), that may produce a reduction of dielectric strength or surface resistivity.

POLLUTION DEGREE. Numeral indicating the level of POLLUTION that may be present in the environment.

POLLUTION DEGREE 1. No POLLUTION or only dry, non-conductive POLLUTION occurs, which has no influence.

POLLUTION DEGREE 2. Only non-conductive POLLUTION occurs except that occasionally a temporary conductivity caused by condensation is expected.

REINFORCED INSULATION. Insulation which provides protection against electric shock not less than that provided by DOUBLE INSULATION.

“RoHS”. European Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

SOLID INSULATION. Insulating materials.

SUPPLEMENTARY INSULATION. Independent insulation applied in addition to BASIC INSULATION in order to provide protection against electric shock in the event of a failure of BASIC INSULATION.

TRANSIENT OVERVOLTAGE. Short duration overvoltage of a few milliseconds or less, oscillatory or non-oscillatory, usually highly damped.

WORKING VOLTAGE. Highest r.m.s. value of the a.c. or d.c. voltage across any particular insulation which can occur when the equipment is supplied at rated voltage.
