

TECHNICAL DATA SHEET

Distributor for the forms

Specialized release agent for plastics, laminates, concrete and polyurethane processing. A high-performance, silicone-free mold release agent designed for efficient processing of plastics, laminates, concrete and polyurethanes. Its innovative, silicone-free formulation allows for subsequent surface treatments — such as bonding or painting — without the need for degreasing. Resistant to temperatures up to 170°C, it leaves no residue and significantly reduces the need for mold cleaning. The 360° valve enables convenient application in any position, including hard-to-reach areas. This silicone-free mold release agent offers excellent slip and anti-adhesion properties. Ideal for use in injection molds, laminate molds and concrete molds.

Product features:

- silicone-free,
- fast-acting,
- high temperature resistance,
- excellent slip and anti-adhesion properties,
- prevents material build-up in molds,
- 360° valve for easy application in any position.

Applications:

- concrete, laminate, and polyurethane molds,
- plastic injection molding,
- manufacturing plastic laminates,
- extrusion and vacuum forming of plastics.

TECHNICAL DATA SHEET

400 ml (ART.AGT-228) - 12 pcs.*

Compatibility:

The Distributor for the forms is safe for use with most mold types, including metal, polyurethane and laminate molds. The absence of silicone allows for immediate post-treatment such as painting, bonding, or further processing, without the risk of surface contamination.

Application method	
Aerosol with tube	Yes

Usage instructions:

Restricted to professional users. Read safety data sheet carefully prior to use.

Before application, ensure the mold surface is clean and dry. Shake the aerosol thoroughly to mix the components, then spray an even layer onto the mold surface. Thanks to the 360° valve, application is possible in any position, making it easy to reach difficult or confined areas. Allow the agent to evaporate fully before starting the molding process.

Package

Aerosol

*Quantity of pcs. in a bulk package.

Storage:

Store in tightly sealed containers in dry, well-ventilated areas, away from sources of heat, ignition and direct sunlight. Do not expose to temperatures exceeding 50° C / 122° F.

Technical support:

AG TermoPasty provides technical support, answering questions about the technical specifications and applications of our products. Please contact us via email at info@termopasty.pl.

Note:

The data presented in this document reflects our current level of knowledge and describes the typical properties and applications of the product. However, the responsibility for determining its suitability for specific applications lies with the user. AG TermoPasty is not liable for the results of product use, as the conditions of application fall beyond our control.
