

Penetrating and lubricating preparation

A revolutionary, multifunctional lubricant that restores the original appearance and factory properties of metal machine mechanisms and automotive parts. Its innovative formula is based on active ingredients, with molybdenum disulfide as the key component. This penetrating lubricant actively displaces water, providing long-lasting protection against moisture while also loosening seized components. It is excellent for firearm maintenance, safeguarding against corrosion and contaminants. An essential tool for every mechanic and DIY enthusiast.

Product features:

- ✓ fast-acting formula,
- ✓ safe for most surfaces,
- ✓ actively displaces water,
- ✓ protects against corrosion and moisture,
- ✓ 360° valve for easy application.

Applications:

- ✓ seized bolts and connections,
- ✓ hinges, battery clamps,
- ✓ car locks,
- ✓ control cables in bicycles and motorcycles,
- ✓ lawnmowers and other garden equipment,
- ✓ firearm maintenance.

Physicochemical properties

Appearance	Colorless gas
Odor	Characteristic
Density at 20°C	~0.80 g/cm ³
Operating temperature	-20°C to 90°C
Shelf life	3 years

Compatibility:

The penetrating lubricant is safe for most surfaces, including metal, rubber, aluminum, and painted surfaces. It can be used on both delicate mechanisms and heavy industrial components, providing reliable protection in any environment.

Application method	
Aerosol with tube	Yes

Usage instructions:

Restricted to professional users. Read safety data sheet carefully prior to use.

Ensure the surface is clean and dry before application. Shake the container well to mix the ingredients thoroughly. Direct the applicator to the desired area and spray the product, using the precision tube for hard-to-reach spots. Allow a few minutes for the liquid to penetrate connections or form a protective layer. If necessary, wipe off any excess with a clean cloth.

Package	
Aerosol	100 ml (ART.AGT-213) - 12 pcs.*

*Quantity of pcs. in a bulk package.

Storage:

Store in sealed containers in dry, well-ventilated areas, away from heat sources, ignition points and direct sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Technical support:

AG TermoPasty provides technical support, answering questions about the technical specifications and applications of our products. Please contact us via email at info@termopasty.pl.
