

RECA Ultra Twist Drill HSS-O

Made from top quality high speed steel giving a much longer tool life, the RECA Ultra Twist drill is manufactured using the latest techniques, which reduces breaking and blunting of the drill tip.

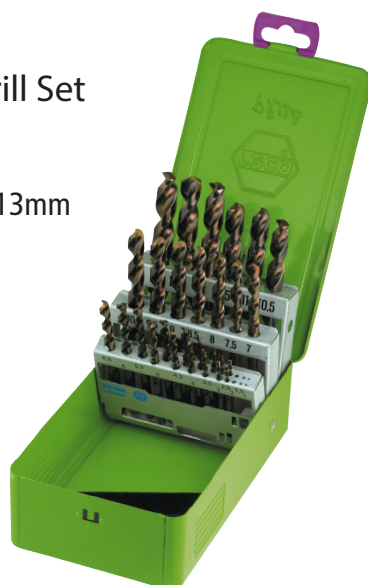

- 50% faster than most conventional twist drills 0624.
- 135° split point angle, helps to centre the drill accurately and reduce wander.
- This point angle is ideal for sheet steel with reduced burring of edges.
- Ideal for drilling in most common materials like mild steel, high tensile steel, stainless steel, aluminium, brass, copper and plastic.
- There is a multifunctional steam oxide (FE2 O4) coating on the drills which helps a drill to retain lubricant, to help wear resistance of the drill and chip flow.
- Quality control is checked after each operation and during final inspection.
- Colour coded for easy reference and storage.

RECA Ultra Twist Drill Set

- 28 pc set 2.5-13mm
- 2 x 2.5-5mm, 1 x 5.5-13mm
