

INFORMATION DOCUMENT REGARDING DATA PROCESSING – DATA ACT

Brand: Sonoff

EAN: 6920075740004

Product name: SNZB-02D
(With Battery)

- Data generated by the device:

1. Device Information: (Device model, device firmware version number)

2. Operational Data

2.1 Status Parameters: (Temperature information, humidity information, battery charge percentage information)

- Data format:

1. Data form: String

2.1 Data form: Number

- Estimated data size:

1. Device Information: 128 bytes per event

2.1 Status Parameters: 4 bytes per event

- Data is generated continuously and in real time:

1. NO

2.1 YES

- Data storage location:

1. Device information: Data is stored locally and in the cloud server

2.1 Status parameters: Data is stored locally and in the cloud server

- Retention period on the remote server:

1. Data is retained along with the device's lifecycle.

- 2.1. Data is retained along with the device's lifecycle.

- Method of accessing the data/Method of downloading the data/Method of deleting the data:

1. Device Information: It can be queried and modified on the settings page of the App, but It cannot be downloaded. The entire device data can be deleted from the App.

- 2.1 Device parameters: It can be viewed and modified on the App. Historical temperature and humidity data can be downloaded, while other data cannot. The entire device data can be deleted from the App.

The information in this document is based exclusively on data provided by the manufacturer. For further information, please contact support@sonoff.tech.
