

INFORMATION DOCUMENT REGARDING DATA PROCESSING – DATA ACT

Brand: Sonoff

EAN: 6920075778304

Product name: AIBridge-26
(RV1126 4GB)

- Data generated by the device:

1. Device information: (Firmware version, Zigbee network information, Sub-device information)
2. Device status. (Gateway status - indicator lights, Networking, Buzzer, etc., Sub-device status)

- Data format:

1. Data form: String
2. Data form: JSON String including Number, Boolean value, String and Arrays.

- Estimated data size:

1. Device Information:
 - Firmware Version: 10 - 20B
 - Zigbee Network Information: 1 - 3KB
 - Sub-device Information: Each device 40KB
2. Device Status:
 - Gateway Status - Indicators, Networking, Buzzers, etc., are generally represented by boolean values. 200 - 500 bytes per item
 - Sub-device Status: Each individual device 40KB

- Data is generated continuously and in real time:

1. Device Information: NO
2. YES

- Data storage location:

1. Device information: Data is stored locally only.
2. Status parameters Data is stored locally only.

- Retention period on the remote server:

1. Data is retained along with the device's lifecycle.
2. Data is retained along with the device's lifecycle.

- Method of accessing the data/Method of downloading the data/Method of deleting the data:

This device does not connect to the cloud and is independent of the App.

The information in this document is based exclusively on data provided by the manufacturer. For further information, please contact support@sonoff.tech.
