

165 iSS PZ/S VDE Insulated screwdriver with reduced blade diameter for PlusMinus screws (Pozidriv/slotted), # 1 x 80 mm
Kraftform Plus – Series 100 VDE

EAN:	4013288179418	Size:	161x26x26 mm
Part number:	05020132001	Weight:	37 g
Article number:	165 iSS PZ/S	Country of origin:	CZ
		Customs tariff number:	82054000

- Insulated blades for secure work at 1,000 volts
- Smooth hard zones for high speed turning, soft grip zones for high torque transfer
- Handle markings simplify finding and sorting of tools
- Hexagonal anti-roll feature against rolling away
- Reduced blade and handle diameter

VDE insulated slotted screwdriver with reduced blade and handle diameter, suitable for actuating low-lying screws in particularly confined working spaces. Multi-component Kraftform Plus handle for fast and low-fatigue working: hard gripping zones for high working speeds whereas soft zones ensure high torque transfer. Individually tested in water bath at 10,000 volts for secure work at the permissible voltage of 1,000 volts. The hexagonal anti-roll feature prevents any bothersome rolling away at the workplace.

**165 iSS PZ/S VDE Insulated screwdriver with reduced blade diameter for PlusMinus screws (Pozidriv/slotted), # 1 x 80 mm
Kraftform Plus – Series 100 VDE**

PlusMinus screwdrivers

Our screwdrivers are tested for dielectric strength under a 10,000 volt load to make sure that their most important property, their insulation, has been exhaustively tested. Each individual Wera VDE screwdriver is subjected to this test to guarantee safe working up to 1,000 volts.

For the use in terminal blocks, control cabinets, switches, relays, sockets etc.

The super slim screwdrivers for Electricians

The super slim screwdrivers for installation jobs in particularly confined spaces. Not only do the blades have a reduced diameter, the handles also have a very slim design.

Individually tested

The individual testing at 10,000 volts, in accordance with IEC 60900, ensures safe working with loads up to 1,000 volts.

Impact strength test

Impact strength tested at -40°C , guaranteeing safety even under extreme conditions.

Multicomponent Kraftform handle

Wera produces the Kraftform handle out of several materials with different properties. A resistant plastic is used for the core which ensures that the blade is held securely even under high strain. A softer material is used for the coloured soft zones, which provides high frictional resistance and allows the transfer of high forces – resulting in less required screwdriving effort. The red sections with their hard surfaces prevent any "sticking" of the hand to the handle, making rapid repositioning of the hand possible.

Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.

Identification marking

The screw symbol and tip size identification markings on the handle make it easier to find the right screwdriver in the tool case, or at the workplace.
