Aluminium empty housing Mx06-Mx15, paintable

Art.-Nr. 2011394

Robust aluminium empty housing for mechanical engineering and automation technology. The OBO Mx series' excellent features make it most suitable for extreme demands in all different areas. It is therefore also best suited for applications in industry, ports and shipbuilding, as well as in the agricultural sector. The series' properties protect the electrical installation when under extreme strain. The products withstand both great cold and heat as well as impacts or kicks on roads, railways or in tunnels. With a protection class of up to IP66, they are optimally protected against the intrusion of water. The aluminium is of course UV-resistant and halogen-free. The cover seal is made from polyurethane. The aluminium housings are sandblasted and are delivered with a cover including stainless steel screws, a seal and 2 or 4 earthing screws. The surface provides a good contact when using metal fittings.
