### OPERATION

1. Line up the terminal to be removed in the connector assembly with the tip of the extraction tool. Insert and slide the extraction tool into the slot on the side of the connector housing as shown. Positioning it under the housing lock as shown in Figure 1.
2. Slide the extraction tool in the direction shown lifting up the housing lock. While lifting the housing lock, push the terminal back through the connector slot and pull the terminated wire out in the direction of the arrow. See Figure 2.

**CAUTION:** Do not reuse the housing once the terminals are extracted.

**CAUTION:** This extraction tool should be used to extract the terminal only. Using it for unintended purposes may cause injury or damage to parts. Be careful not to deform the end of the terminal. Avoid lifting the housing lock too high.

**CAUTION:** Molex specifications are valid only when used with Molex terminals, applicators and tooling.
