

2-Channel Analog Input; Resistance Measurement; Intrinsically Safe; Extreme

This analog input module directly connects to Pt and Ni resistance sensors or potentiometers located in hazardous areas of Zones 0 and 1.

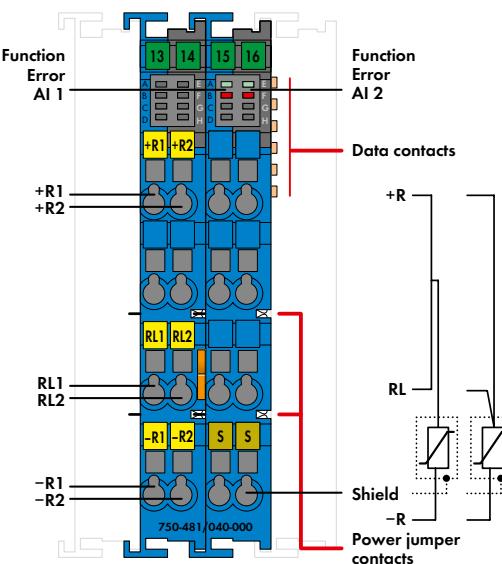

The WAGO-I/O-SYSTEM 750 XTR must be installed either in Zone 2 or in a non-hazardous area.

The 24 V supply is derived from the module's power jumper contacts. The shield is directly connected to the DIN-rail.

Indicators:

- Green LED (availability ON/OFF)
 - Red LED (short circuit, wire breakage, measurement range overflow/underflow)

Field and system levels are electrically isolated.

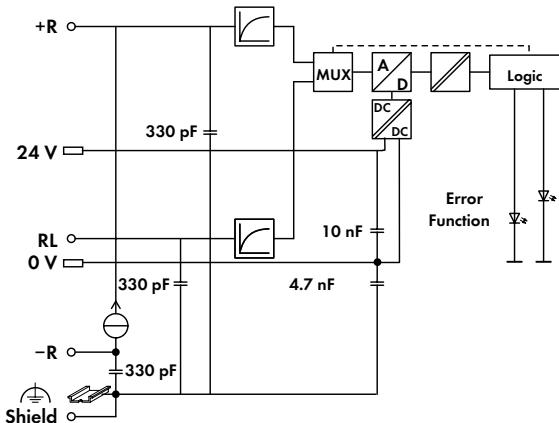

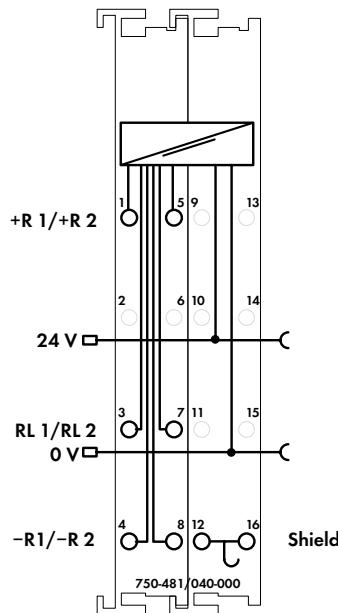

Note: The analog output module must only be operated via 24 VDC Ex i XTR power supply (750-606/040-000)!

General information (e.g., installation regulations) on explosion protection is available in the WAGO-I/O-SYSTEM 750 XTR manuals!

The device is ideal for operation in harsh environments thanks to:

- Extended temperature range
 - Greater immunity to impulse voltages and electromagnetic interference
 - Higher vibration and shock resistance
