

GN 479.1

Retaining plates

INOX
Stainless Steel

Swivel width $k=16$

Clamp mounting GN 478

Retaining plate

Swivel width $k=30$

Clamp mounting GN 47

Retaining plate

technical informations

Material

AISI 304 stainless steel, matte shot-blasted.

Assembly

Fixing screws are not included parts of the order.

Features and applications

Retaining plates GN 479.1 are designed as universal mounting elements, e.g. for integrating specific bore patterns. The attachment bore matches the central thread of GN 478 clamp mounting. For $k=30$, the cross-shaped oblong holes long provide extra adjustability and allow the use of two fixing screws. Fixing screws to be ordered separately.
